Junior Software Developer

Software Engineering Technology student proficient in C#, Python, SQL, and full-stack web development (MERN). Experienced in hardware testing, automation, and collaborative database design. Continuously expanding full-stack skills through self-directed study in modern React ecosystems through Udemy "React – The Complete Guide (incl. Next.js, Redux)".

Technical Skills

Languages: C#, Python, JavaScript, HTML/CSS, Java, SQL, PL/SQL.
Frameworks & Libraries: Mern Stack (MongoDB, Express, React, Node.js)
Developer Tools: AutoCAD, GitHub, Git, VS Code.

Education

Software Engineering Technology (Co-op) Advanced Diploma September 2025 – Present
Centennial College, Toronto, ON
Courses Include: Web Interface Design, Linux/Unix Operating Systems, Web Application Development, Software Systems Design, Java Programming, C# Visual Studio, Python.

Welding & Fabrication September 2021 – June 2022
Mohawk College, Hamilton, ON
Courses Included: Hands on training with all types of welding, Work with Autodesk AutoCAD 3D software. Learned how to create and read drawings and schematics for fabrication.

Academic Projects

Finalist in 2026 General's Lab Innovation Program as a member of CONSTRUCTMATRIX

- Assisted in the engineering of an automated safety report system as part of a competitive innovation program, earning recognition as a program finalist.
- Actively communicated with professionals in the field to shape our project to real world requirements.

Video Game Retailer Database – SQL

- Co-developed a relational SQL database for a retailer in the video games/console industry
 - Sprint meeting planning for a 3-person team.
 - Helped manage task allocation and team workflow activities.
-

Work Experience

Bay-Lynx Manufacturing – Electrical Panel Builder & Welding June 2022 – August 2024

- Built and wired electrical panels for concrete mixing trucks, stone spreaders and cambering machinery.
- Tracked and maintained inventory levels for all electrical components using Excel to streamline reordering workflows.
- Managed task schedules and work-in-progress projects across assembly.
- Debugging and testing finished electrical panels to ensure quality control before shipping to the customer
